National Monument

Rangamati

Bangladesh

Bangladesh, a country of SAARC located in South-east Asia. On December 16, 1971, with the history and dignity of great liberation war and with the sacrifice of 3 million martyrs the map of the world was glorified by the birth of a Brave nation, Bangladesh. It is a land of evergreen nature, moderate climate, gangay delta region and history,

tradition, society of thousand years. Bangladesh is the darling child of nature decorated with hills, rivers and sea. The only nation of the world who laid down their lives to establish the mother tongue Bangla. For that 21st February is the International mother language day. The longest sea beach of the world Cox's bazar and one of natural 7 wonders of world the mangrove forest Sundarban is in Bangladesh. In short, Bangladesh can be termed as "Gift of nature" Asset of blood

MESSAGE

From the Founder Chairman

Health, Wealth & Prosperity are the criteria of a flourishing society. Healthy nation is a wealthy nation. With this noble aim the Founder Directors of Eastern Medical College applied first in the year 2003 to the government seeking permission to establish a private medical college and a modern 250 bed hospital attached to it.

By the grace of almighty Allah we started the classes of 1st year MBBS in Eastern Medical College from July' 2005. The year 2007 is a memorable year for Eastern Medical College with the inauguration of its new campus at Kabila, Comilla which is situated not very far from the capital city Dhaka requiring only 1.5 hours to reach the campus. Our college campus is well planned with Hospital & Faculty building of different departments having enough space which is free from public gathering representing a real medical academic environment.

I wish to express my enormous gratitude to all who has given enormous efforts in establishing this college. I am also highly grateful to the present Govt. of People's Republic of Bangladesh who has taken an exceptional step by changing the procedure of admission in all Private Medical Colleges of Bangladesh.

Comilla is a busy Medical hubhub of Eastern Bangladesh. Eastern Medical College in Comilla is happy to contribute its part towards the service of the needy public. May Allah help us.

Shah Md. Selim

Chairman, Eastern Medical College

MESSAGE

From the Principal

May Allah bless all of you who have decided to tread the path of medical education.

I am glad to inform you that Eastern medical college is forging ahead with confident steps towards a bright future. I invite you all to join us in this exiting journey. It is now a fourth time that Eastern Medical College has thrown wide open its doors to welcome the next batch of aspiring medicos into its fold.

. The new campus at Kabila, Comilla is all what a student & teachers would dream of. Hostel environment of Eastern Medical College is what one would term as "Home away from home". We at Eastern Medical College are always there for you, at any time of the day or night to parent you, guide you, help you to mould yourself into that perfect human being who is capable of dedicating himself to the service of mankind. Our dedicated, experienced and highly qualified batch of teachers have vowed to make Eastern Medical College a role model of medical institute in Bangladesh. I express my appreciation and thank all the founder members of this institution for their commitment towards the achievement of this common goal.

Professor Dr. Golam Samdani

MD, MS, Ph.D, FACS, FICS

Principal, Professor & Head of the Dept. of Surgery

MESSAGE

From the Vice Principal

Eastern Medical College is a non-profitable service oriented academic institution which is housed at present in a multistoried building at Race Course (old campus) & Kabila (new campus), Comilla having adequate accommodations for lecture, tutorial & practical classes of various subjects. All the departments are well equipped with teaching materials and highly qualified, experienced teachers. It has a standard conference room and a library with rich collection. The new campus at Kabila, Comilla was hailed as a great blessing by the local public.

I wish to congratulate you who have decided to pursue your studies in medical science. I am sure, those who would be able to study in Eastern Medical College will enter one of the finest Medical College in the country which is committed to impart the best possible professional knowledge. I would like to assure the students who want to get themselves admitted to this college that we shall make every endeavors to provide quality education so that they can become an asset to the nation. Eastern Medical College has facilities to train its students in both rural and urban environments due to which students will be expert in dealing with health problems of both categories.

Instruction for the students

1. All students are to attend classes in clean well-dressed white Apron.
2. All students are to carry their "Identity Cards" while they are in the college.
3. Rings, bangles are discouraged as they cause impediments to practical work.
4. Fashionable dresses, untidy hair, slippers are discouraged in the college campus.
5. Environments to be kept clean. Students should throw litters into waste paper basket.
6. Pasting of posters on the walls of the college and the hospital buildings and or hanging of posters in the college and in the hospital premises are prohibited unless permitted by authority. These are considered as acts of indiscipline and offenders are liable to punishment.
7. Smoking is strictly forbidden in the college campus.
8. All types of demonstrations, processions, shouting in the college and hospital premises are prohibited and students involved are liable to be expelled from the college.
9. Abstentions from classes individually or in group or in a mass without prior information/without valid reasons are punishable by imposition of daily fine of Tk. 500/- individually. Guardians will be informed of such acts.
10. Students will state their problems/ grievances/ inconveniences to their Teacher Guide. The Guide will try to solve the problems of the student's himself/herself or refer them to the principal. Statement of the problems/ grievances/inconveniences by the students must be in an orderly and disciplined manner. Any act of indiscipline on the part of any student including usage of abusive words or objectionable words and sentences will make the students liable to be punished by expulsion from the college.
11. Student must not misbehave with the staff or employees of the college or the hospital. Acts of misbehavior are also acts of indiscipline and liable to punishment.
12. The students are expected to maintain the highest standard in their academic activities. Smoking or any sort of addiction is strictly prohibited in the campus.

CODE OF MEDICAL ETHICS

Ethics is all about ideal human conduct and an understanding of the moral values in which actions are judged as right or wrong; and persons and institutions are judged as praiseworthy or blameworthy.

All medical decisions involve an ethical component in addition to clinical or scientific component. Major ethical issues have arisen from increased respect for patients' rights, financial restraints and new technologies.

Behind medical ethics, must stand such cardinal virtues as wisdom, justice, temperance, courage and benevolence.

Patient's rights

The rights of the patient cover a broad range of moral and legal issues. The following are generally recognized as the rights of the patient;

- i. right to be treated,
- ii. right to privacy
- iii. right to know about the nature of illness and treatment required
- iv. the physician to keep information contained in patient's record confidential unless its release is required by law.
- v. right to have clear idea about medical bills he or she has to pay,
- vi. right to have access to his or her medical records.

Code of medical ethics

Almost up to the present century physicians were trained under an apprenticeship system, and each apprentice was required to take the Oath of Hippocrates. This code of ethics forms the basis of the Declaration of Geneva (1948) and the International Code of Medical Ethics (1949).

International Code of Medical Ethics

The "International Code of Medical Ethics", as adopted by the World Medical Association in London, in October 1949 describes.

a) Duties of Doctors in General

A doctor must always bear in mind the importance of professional conduct. A doctor must not allow himself to be influenced merely by motives of profit.

b) Duties of Doctors to the sick

A doctor must always bear in mind the importance of preserving human life from the time of conception until death.

A doctor owes to his patient absolute secrecy, complete loyalty and all the resources of his science.

c) Duties of Doctors to each other

A doctor ought to behave to his colleagues as he would have them behave to him.

The Oath of Hippocrates

"I swear by Apollo the physician, and Aesculapius, and Health, and All heal, and all the gods and goddesses.

That, According to my ability and judgment, I will keep this Oath and this stipulation - to reckon him who taught me this Art equally dear to me as my parents, to share my substance with him, and relieve his necessities if required; To look upon his offspring in the same footing as my own brothers, and to teach them this Art, if they shall wish to learn it, without fee or stipulation;

Students of EMC during a Day Visit at Rajdebi Maternity Clinic

Declaration of Geneva

And that by precept, lecture, and every other mode of instruction, I will impart a knowledge of the Art to my own sons, and those of my teachers, and to discipline bound by a stipulation and oath according to the law of medicine, but to none others.

I will follow that system of regimen which, according to my ability and judgment, I consider of the benefit of my patients, and abstain from whatever is deleterious and mischievous. I will give no deadly Medicine to any one if asked, nor suggest any such counsel; and in like manner I will not give to a woman a passery to produce abortion.

With purity and with holiness I will pass my life and practice my Art.

I will not cut persons laboring under the stone, but will leave this to be done by men who are practitioners of this work.

Into whatever houses I enter, I will go into them for the benefit of the sick, and will abstain from every voluntary act of mischief and corruption and further from the seduction of females or males, of freedom and slaves.

Whatever, in connection with my professional practice or not in connection with it, I see or hear, in the life of men, which ought not be spoken of abroad, I will not divulge, as reckoning that all such should be kept secret.

While I continue to keep this oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times; But should I trespass and violate this Oath, may the reverse be my lot*

The foregoing Oath of Hippocrates have always been the foundation of all ethical relations in the practice of the art of healing.

The World Medical Association in Geneva adopted in September, 1948 the following declaration, which is intended to be sworn when a doctor is admitted as member of medical profession:

I solemnly pledge myself to consecrate my life to the service of humanity.

I will give to my teachers the respect and gratitude which is their due.

I will practice my profession with conscience and dignity.

The health of my patient will be my first consideration.

I will respect the secrets, which are confided in me.

I will maintain by all the means the honor and noble tradition of the medical profession.

My colleagues will be my brothers.

I will not permit considerations of religion, nationality, race, part politics or social standing to intervene between my duty and my patient.

I will maintain the utmost respect for human life from the time of conception.

Even under threat I will not use my medical knowledge contrary to the laws of humanity.

I make these promises solemnly, freely and upon my honor*.
